

Our School Activities provide:

- a tangible and creative method of delivering the Curriculum to meet the needs of all students
- motivates pupils to achieve their potential by encouraging learning through a creative and personalized approach
- links to No Child Left Behind, Inclusion, Enterprise and the United Nations Millennium Development Goals
- covers PSHE topics
- aligns to adult literacy and numeracy entry level requirements
- the resources are managed and used for many different activities, making resources, stay and play sessions, generating income, teaching the early years foundations stage and for engaging with parents. The program is sustainable as we can use recyclable materials.

NEW! - Curriculum-linked Matrix with EVERY Starter Kit & Bundle

Die Cutter and Dies

Die-cutting is a similar process to using a cookie cutter, by using a hand operated die-cutting machine. The die machine uses steel rule die shapes to cut through a large range of materials, for example; balsa wood, cardstock, felt, wallpaper or leather (all materials are listed within our activity guides).

The use of the die machine and dies minimizes the time, patience and manual dexterity required when using scissors.

Die-cutting is fast, fun, completely safe and produces pleasing results for students of all levels

Key reasons for using the die machine and dies:

1. The die-cutting machine reduces time and patience required when using scissors.
2. The die-cutting machine helps those with special educational needs to produce work to the same level as their peers, therefore helping to reduce stigma and increase confidence.
3. The die-cutting machine can do up to 30,000 cuts before any maintenance is required.
4. The die-cutting machine can cut through a wide and interesting range of materials.
5. Because the blade is completely embedded in a rubber surface, using this machine is extremely safe for all age groups and ability levels.

We have created 17 activity guides using the die machine which are listed below.

- Anti-bullying, Captain Confidence, Community, Dynamic Dad, Emotions, Enterprise, Go Green, Going for Goals, Healthy Me, I Love my Life, Magic Maths, My Family, Olympics, Stay Safe, Transitions 1 (Pre-K to Elementary), Transitions 2 (Elementary to Middle), Word Play

Each guide provides teacher lesson plans covering four one hour sessions.

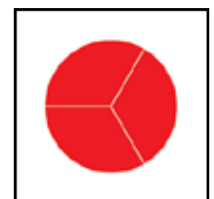

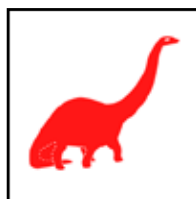

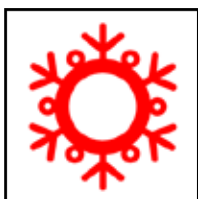

The die machine and dies required to complete activity guide work are reusable.

The program is inclusive and approved by nasen (national association of special education needs).

Using our program learners develop skills for life.

We received many school teacher requests to build topic "bundles" which are sets of activities surrounding key curriculum topics in maths and science. We provide the following bundles.

Starter Kit 1, Starter Kit 2, Food, Handling Data, Wild Animals, Farm Animals, Transport, Understanding Shape, Nature, Life Processes and Living Things, Humans, Festive 1, Festive 2, Nativity.

Starter Kit One

Starter Kit One equips you with:

- 1 ½" upper case letters and number die set / 1 ½" lower case letters and punctuation die set
- Schools Program Manual
- AllStar Die Machine
- 10 Activities for Pre-K and Elementary primarily covering Literacy and Math

Activities include:

- Alphabet book-make a personalized spelling book
- Alphabet line-sequence and match upper and lower case alphabet
- Classroom labels-create visual spelling aid for classroom objects
- CVC game-making and reading CVC words

Starter Kit Two

Starter Kit Two equips you with:

- 3 ½" upper case letters die set / 3 ½" lower case letters die set / 3 ½" number die set
- AllStar Die Machine
- Schools Program Manual
- 10 Activities for Pre-K and Elementary primarily covering PSHE & Citizenship, Literacy and Math

Activities include:

- Alphabet frieze-linking letter sounds and letter names
- Assembly Board- create a visual reference for assembly times
- Date chart- sequence and spell days and months
- Make 10- reinforcing addition to ten

Food Bundle - 5 dies

- 5 Activities for Pre-K and Elementary primarily covering PSHE & Citizenship, Math, Religious Education and Science.

Activities include:

- Loaves and Fishes – explore the Bible story, poverty and sharing
- Harvest Festival – origins and significance
- Favourite Food – the importance of healthy eating

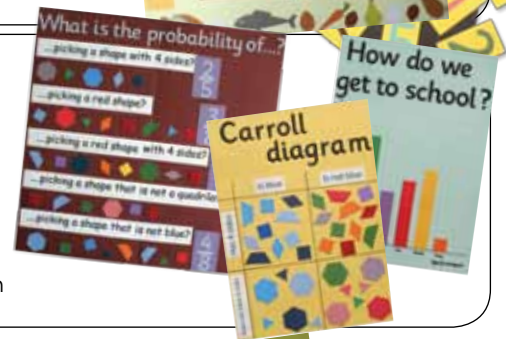

Handling Data Bundle - 5 dies

- 5 Activities for Elementary primarily covering Math.

Activities include:

- What is the probability of...? – to use fractions to express probability
- Sorting Shapes – using a Venn diagram
- Sorting Shapes – using a Carroll diagram
- How do we get to school? – collecting, organising, interpreting data in a block graph

Human Bundle - 20 dies

- 20 Activities for Pre-K and Elementary primarily covering PSHE & Citizenship and Science.

Activities include:

- Heart and lungs-create a working model of the heart or lungs
- Doctor role play kit- create a surgery in the classroom
- Life cycle of a frog-create a whole class and individual version
- The effects of drugs-research the effects of various drugs

Wild Animals Bundle - 6 dies

- 6 Activities for Pre-K and Elementary primarily covering Math and Literacy.

Activities include:

- Number cards – to reinforce counting and sequencing of numbers
- Wild Animals Dice Game - to encourage pupils to use wild animals as a stimulus for speaking and listening
- Wild Animal Puppets - for pupils to use puppets to tell stories and perform to the class

Farm Animals Bundle - 6 dies

- 6 Activities for Pre-K and Elementary primarily covering PSHE & Citizenship, Literacy and Math.

Activities include:

- Storytelling with stick puppets-develop and tell a story
- Animal information Chart-extend vocabulary
- Number cards-recognize numbers and count objects
- Puzzles-match animal parts to complete shapes

Transport Bundle - 6 dies

- 6 Activities for Pre-K and Elementary primarily covering PSHE & Citizenship, Literacy and Math.

Activities include:

- Measuring Flights-carrying out a science investigation
- Rules to stay safe- rules for and ways of keeping safe
- How we travel-collecting data and presenting it in a block graph
- Tell a story- create a story based on transport

Understanding Shape Bundle - 12 dies

- 12 Activities for Pre-K and Elementary primarily covering Math.

Activities include:

- Compass direction game-describing the position of shapes on a grid
- Problem solving with tangrams-use tangrams to make and compare properties of different shapes
- Reflections-create and complete symmetrical patterns

Nature Bundle - 13 dies

- 13 Activities for Pre-K and Elementary primarily covering PSHE & Citizenship, Science, Geography and Math.

Activities include:

- Consonant flowers-interactive way to practice consonant blends
- Water cycle-make a visual water cycle
- Green plants-label a plant and consider what conditions plants need
- Changing shadows-interactive activity looking at how shadows change

Life Processes & Living Things Bundle - 18 dies

- 18 Activities for Pre-K and Elementary primarily covering Science.

Activities include:

- Life cycle of a butterfly-make a visual record of this life cycle
- Giant Sorting Key-create a key to sort a selection of living things
- Pollination-Interactive display showing how insects help in pollination
- Who is it game?-identify living things using life processes

Festive 1 Bundle - 7 dies

- 7 Activities for Pre-K and Elementary primarily covering Design and Technology and Art and Design.

Activities include:

- Advent Calendars - to design, assemble and make an Advent calendar using a selection of materials
- Christmas Border - to create a Christmas border to complement their writing
- Christmas Tree Decorations - to make a 3D decoration to hang on a tree.

Festive 2 Bundle - 6 dies

- 6 Activities for Elementary primarily covering Design and Technology and Art and Design Activities include:

Activities include:

- Angel Bunting - to design and make Christmas bunting using a range of materials.
- Christmas Cards - to design and make a Christmas card using a range of materials
- Christmas Tree Napkins - to design and make a napkin exploring different materials and techniques

Nativity Bundle - 10 dies

- 10 Activities for Pre-K and Elementary primarily covering Religious Education and Design and Technology Activities include:

Activities include:

- Modern Day Nativity - to respond to the Christmas story and adapt it to a modern day setting.
- Nativity Colors - to know colors and their names
- Nativity Cube Game - to consolidate their learning about the significance and meaning of the Christmas story.

Educational Paper Craft Packs

AB Curriculum also provide exciting educational paper craft packs many of which link to the activity guides. The list of educational paper craft pack is listed below.

- Ancient Egypt (12 x 12")
- Back to School (12 x 12")
- Careers (12 x 12")
- Communication (12 x 12")
- Down on the Farm (12 x 12")
- Ecosystems (12 x 12")
- Family Tree (12 x 12")
- Knight in Shining Armor (12 x 12")
- Music (12 x 12")
- My Home (12 x 12")
- My Journey (12 x 12")
- My Planet (12 x 12")
- Pretty as a Princess (12 x 12")
- School Days (12 x 12")
- Solar System (12 x 12")
- Sports (12 x 12")
- Transportation (12 x 12")
- Wheels in Motion (12 x 12")
- All About Me (8 x 8")
- Birthday (8 x 8")
- Friends (8 x 8")
- I Love My Pet (8 x 8")
- My Vacation (8 x 8")
- Sleepover (8 x 8")
